

Designed especially for the chef who uses knives for extended periods of time, or those who have difficulty in gripping.

However, everyone will feel the benefits of the contoured soft grip handle which provides the optimum cutting angle allowing the wrist and hand to work in a natural and relaxed position.

The specially shaped blades increase leverage and improved knife control, while the colour coded handles allow easy identification of each knife when stored in a knife block.

- **Sculpted, comfortable soft grip handle**
- **Angled blade for perfect control**
- **Colour coded for easy identification**
